### **DETAILED ACTION**

1. Applicant's communication filed on April 20, 2005 has been carefully studied by the Examiner. The arguments advanced therein, considered together with the amendments made to the claims, are persuasive and the rejections based upon prior art made of record in the previous Office Action are withdrawn. Claim 1 has been amended. Claims 1-12 are pending.

2. The declaration filed on April 26, 2005 under 37 CFR 1.131 is sufficient to overcome the Park et al. (U.S. Patent Application Publication 2004/0042759) reference.

### ***Allowable Subject Matter***

3. Claims 1-12 are allowed.

4. The following is an examiner's statement of reasons for allowance: The declaration under 37 CFR 1.131 filed on April 26, 2005 disqualifies Park et al. as prior art.

5. Takeda et al. (U.S. Patent 5,467,218 cited by Applicant) discloses a large mode field diameter optical fiber which is a single mode fiber having a core 23/24 and a cladding and wherein the core has an inner core region 23, at least partially doped with a rare-earth dopant Er and a co-dopant Al, and an outer core region 24 at least partially doped with a dopant Er, wherein the mode field diameter exceeds 5.5  $\mu\text{m}$  at a wavelength of 1550nm. See Figure 8. However, Takeda et al. does not disclose the type and amount of the rare-earth dopant and its co-dopant in the inner core region and of the dopant in the outer core region being adapted to achieve a refractive index in the outer core region that is lower than the refractive index of the inner core region. Takeda et al., alone or in combination with the prior art of record, therefore does not disclose or render obvious the optical fiber having the claimed refractive index profile.
